Subject: BaP Supp Info document- Tables and Figures
Attachments: Supplemental Information for Benzoapyrene (External Review Draft)-KH-RS-GC-KH-MH-JS-5-13-14 comments.docx

Hi Vicki,

We need your skills with an unruly BaP Supplemental Info document! Several tables keep coming unlinked from the TOC. Right now, we seem to have an issue with Tables D-14 and E-9. Also, Mefruz mentioned that Table E-23 seems to like to come unlinked. I've also found this issue with some of the figures. In addition, none of us can seem to get Figure E-21 on the same page with it's heading. Can you take a look at these tables and figures and make sure they are in the TOC? Seems like there is some sort of formatting glitch with the Supplemental Info document. Let me know if you need more info. I'm hoping you have some time to look at this in the next 2-3 days. If not, let me know!

Thanks,

Kathleen

I managed to add all the missing tables and figures into the table of contents. Well all except Table E-9. I tried everything and I cant seem to get it to show up in the table of contents. I think we might need to ask Vicki Soto about that one.

Also a heads up, table E-23 likes to appear and disappear. Every time somebody changes anything on the table of contents E-23 takes it as an opportunity to break. So you have to manually fix it every time you do anything else. -_-

Sure that's fine. The callouts aren't linked are they?

Can you take a shot at fixing the version you sent on 4-7?
Do you think you have time to work on it next week?

I think what happened is that the changes in the numbers might have broken the links for some. The easiest way I know of is to break all the links and reinsert them.

So unfortunately, this version of the Supplemental Info seems to have a glitch with the TOC. I'm noticing that several tables and figures are no longer showing up in the TOC.

Missing tables include:
D6 D14 E9 E10 E17 E19 E23

Missing figures include:
E22 E21 E23

Not sure what is going on. Mefruz, do you know how to fix this? If you're not sure, I can send the document to Vicki Soto for some trouble shooting.

Yup the page numbers in the table of contents should match up.

Thanks so much Mefruz!

Were you able to update the table of contents as well?

Hi Jamie & Kathleen

I totally forgot that I still had this document. I went through the entire supplemental document and found all the table and figure numbers and call outs to be okay in appendix A, B, C, E and F. However in appendix D all the table numbers were off starting from table #11. They should be fine now but the titles are starting to look really unruly thanks to track changes. I have attached the updated document.

Mefruz,
Any way you can help with the below request?
Thanks,
Jamie

Here is the revised Tox Review and Supp Info. There are a few loose ends (a glitch with a hero reference and some TOC issues). Also, it would be great if Mefruz could check the table and figure numbers and call outs in appendix D and E since we added and deleted some tables in those sections. I've left in a few comment bubbles for added info or to mark where something needs to be fixed.

Hope the documents don't crash on you, all the track changes are making it unruly!

See you all Wednesday!

-Kathleen
